Interpersonal Skills LAB

Managers, team leaders or project managers spend ninety percent of their time on communication, team management or task coordination. Distributed knowledge, complexity and time pressure are the most exciting challenges in this work.

In the «LAB», important interpersonal skills are analyzed and trained under precisely these types of constraints.

INTERPERSONAL SKILLS LAB OFFERS TRAINING WITH AN ATTRACTIVE RETURN ON INVESTMENT.

1. MEASURES BEHAVIORAL DIMENSIONS
THE MEASUREMENT DIRECTLY SHOWS THE
CONSEQUENCES OF BEHAVIORAL OPTIMIZATION.

2. RENDERS THE HUMAN FACTOR UNDERSTANDABLE UNDERSTANDABLE

MANAGEMENT, TEAM DYNAMICS AND
BEHAVIORAL PATTERNS UNDER STRESS BECOME
READILY UNDERSTANDABLE.

3. LIGHTNING QUICK AND HIGHLY EFFICIENT

ENJOY SHORTER TRAINING PERIODS AND LONGER RETENTION.

LEARNING AT THE SPEED OF LIGHT

PARTICIPANTS LEAVE THE «LAB» WITH FIELD-TESTED PLANS OF ACTION THAT CAN BE IMPLEMENTED IMMEDIATELY.

HIGH IMPACT LEARNING ENABLES PEOPLE TO CHANGE THEIR ATTITUDES IN NO TIME AT ALL.

It is great that you are interested in a playful approach to competence development. Here you learn about a method where participants experience the consequences of their actions immediately and can discover and work out individual solutions on their own. I consider this approach to be a magic formula to high learning impact. It is the common thread running through the method I invented in 1998 for undergoing systematic training on interpersonal skills. Welcome aboard. We have an engaging and educational voyage of discovery ahead of us...

Cord Lindeke ScrumMaster Software AG (Germany)

It is essential in agile software development that IT experts conduct target-oriented communication and that they have the ability to organize themselves into small teams. With Interpersonal Skills LAB developers train these skills within realistic boundaries. Solutions are also found in the process and help to disseminate special knowledge throughout the entire team or optimize pair programming. In addition, this type of training promotes team cohesiveness in no time at all.

Mark Steiner Consultant & Trainer Line5 GmbH (Switzerland)

The Interpersonal Skills LAB is an efficient and effective tool for fully detecting behaviors in pressure situations, learning from them and developing new and more expedient modes of behavior to try out and drill. There is an extremely high return on training. The link to everyday practices begins right away during training and is apparent from how successfully the training can be applied to regular everyday situations as well as tense crisis situations.

Prof. Dr. Willy Christian Kriz Professor for Organizational Behavior, Human Resource Management, Management and Systemic Organizational Development FH Vorarlberg, University of Applied Sciences (Austria)

The Interpersonal Skills LAB is a practical laboratory for our business administration students and industrial engineers. We use it in teaching theories of teamwork and communication and in research on team skills and decision-making under stress. What makes the tool particularly compelling is that behavioral dimensions and misconduct under real time pressure are rendered measurable and the lessons learned can be readily transferred to a wide variety of practical contexts.

Heinz Weber Senior Captain & Head of CRM Training Swiss International Airlines (Switzerland)

Our joint training of pilots and air traffic controllers attracted attention worldwide. The Interpersonal Skills LAB is the ideal tool for covering the subjects of communication, teams, decision-making, resource deployment, and conflict resolution. It allows trainees to practice interpersonal factors in a playful way in artificial as well as realistic settings. The pluses are that team performance is measured objectively and that we can adjust the exercises to fit the given objective.
